

Lower Grades

<http://www.timemonsters.com/>

An animated site teaches children how to tell time. There are different levels, so you can go to the level that is appropriate for each child.

<http://gingerbooth.com/flash/patblocks/patblocks.php>

This site works well for individual students to do on a computer. They can arrange pattern blocks into patterns or shapes.

<http://illuminations.nctm.org/ActivityDetail.aspx?ID=217>

The Coin Box helps students learn how to count, collect, exchange, and make change for coins.

<http://www.ixl.com/math/grade-2>

This site uses quizzes to practice math skills – the site is graded and organized by topic. I have used many in the measurement section. However, you can only do a limited number per day without a membership.

<http://www.funbrain.com/numbers.html>

The math baseball game is good for working on math facts. There are other games on that site also.
